

INVENGO INTELLIFI SOLUTION

Localisation & Identification | easy & affordable

Imagine you're easily able to identify and localize people or products in and around your building. With Invengo-Intellifi Smartspots you can realize this by creating a so called smartspot, a location & identification enabled hotspot. The solution comprises of smartspots, tags and the Brain web services to make the information easily available to users. In order to be triggered by a smartspot, people and products are equipped with a small passive RAIN RFID tag that can be easily integrated in a badge, a card, or any other product or package. People can also be identified by a Bluetooth LE phone. Together with the Brain web services and Apps, the information gathered by the system becomes directly available through smartphones, tablets, webpages and any Office applications.

Invengo – the global RFID technology provider – is a leading developer and manufacturer of high quality, intelligent RAIN RFID and HF/NFC connectivity solutions and consumables (tags & inlays) utilized in the Internet of Things. With a focus on RFID innovation, Invengo has created a leading product line in retail, (industrial) laundry, library, (public) transportation, healthcare, and many other industries.

Invengo Technology Pte. Ltd. (SG) is the International Headquarters of Invengo Information Technology Co. Ltd, listed on Shenzhen Stock Exchange (SZSE: 002161.SZ). Employing over 600 people globally, Invengo is one of the largest publicly traded, RFID / IoT oriented companies in the world.

Smartspots

The Smartspots deliver the core of the identification and localization service. They can work on their own or interact with each other to build up a grid and extend the range of your spot. Smartspots can be easily mounted on any surface. They have multiple connections for power and data to make installation as easy as possible. They contain a powerful antennas with unprecedented reading performance for passive RFID tags or Bluetooth LE enabled tags or smartphones.

Services & Apps

The Invengo-Intellifi Brain web services enable easy access to all your information by using Apps on smartphones and tablets. You can also easily access information through a web browser or even Office applications.

The web service API provide a set of core functions. These services are aimed at delivering solutions for nearly all basic & practical user needs. The Intellifi-Invengo concept allows third party web developers to easily introduce localization and identification into their applications.

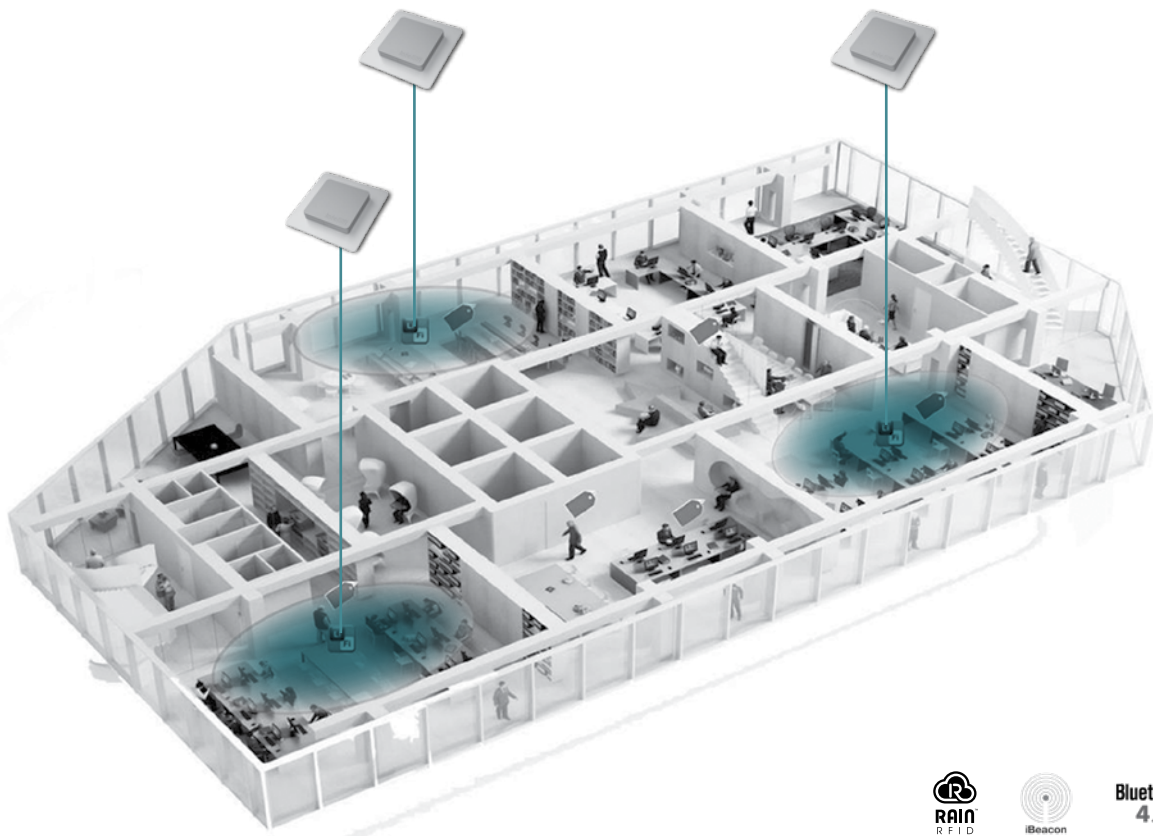

Passive tags are based on standardized UHF EPC Gen2 technology or Bluetooth Lower Energy. Depending on the application tags can be integrated in badges, packages, ruggedized housings.

Applications may include:

- People tracking
- Asset management
- Interactive experiences
- Inventory checks in cars
- Smart displays
- Flex working

Core services

- Identification
- Presence detection
- Sensing & Controlling
- Localization
- Tracking
- Counting
